Approval of Request for JAN Waiver, Contract RD-71PLEASE RETURN TO
TECHNICAL DIVISIONRef : [redacted] Letter of Request, "Request for Approval of
Fabrication Material and Waiver of Parts, Contract No. RD-71"

25X1

1. Section 3.1.3. of Specification No. 54-A-1020-A, "Development Specification for RD-11AA Transistorized Communications Receiver", states that the contractor shall determine the relative merits of aluminum versus magnesium for fabrication of the equipment case. Section 5.1.1. of this specification states that the contractor may utilize components other than those JAN approved provided specific approval is granted for their use prior to submission of any prototype model.

2. In accordance with the terms of the contract, the [redacted] Corporation has submitted a request for such approval as defined by the referenced letter. Our engineers have carefully reviewed this request and agree that the findings and statements of the [redacted] are valid. We request, therefore, that the contractor be advised that the use of aluminum as a case material, and waivers for the use of the non JAN approved items as defined by the reference are approved.
